

Our Body, The Universe Within

is coming to Southern California.

The Science Experience is bringing the exhibit “Our Body, The Universe Within” to the Inland Empire (Riverside & San Bernardino Counties) in Southern California. This opportunity has been offered to us because of our commitment to engaging students and the public in exciting interactive activities for learning. We will be working with our local medical institutions – including schools of medicine, nursing and EMT – as well as medical device providers and drug companies to bring this exhibit to our community for the purpose of providing training opportunities in medicine and anatomy. Here are some of the things one will be able to see and learn:

Benefit to the Community

This opportunity is unique and will provide an educational boost which will lead to well-paying jobs in our underserved communities.

Students at our medical institutions as well as the general public will be able to understand and experience every part of the human body.

We Need Your Support

We are raising \$5 million dollars in donations and equipment, and developing partnerships in order to bring this exhibit to realization by June 2017. The Body Exhibit Committee is co-chaired by John Williams, M.D. and Ludwig Cibelli, M.D. who are working with institutions, companies and individuals interested in supporting this endeavor.
